

## **StrikeForce Technologies, Inc. Joins Oracle Identity Assurance Partner Alliance Initiative**

EDISON, NJ--October 07, 2008 -- StrikeForce Technologies, Inc. (OTC BB: SKFT), a company that specializes in the prevention of Identity Theft, today announced it has joined the recently announced Oracle Identity Assurance Partner Alliance. The purpose of the Alliance initiative is to combat online fraud, help eliminate identity theft, and improve overall enterprise and client security. Members of the alliance plan to deliver solutions that integrate technologies such as identity proofing, geographic location, two-factor and "Out-of-Band" authentication, endpoint security and secure remote access, to Oracle's Access Management Suite. StrikeForce is also a member of the Oracle® PartnerNetwork.

StrikeForce plans to leverage its ProtectID™ authentication platform within the Alliance. ProtectID™ was built using the concept of two-factor "Out-of-Band" authentication, whereby the user name and password is separated and sent to the host server via separate physical channels. The platform offers many types of authentication methods (Phones, Blackberry, One-Time Passwords, Smartcard, keyfob tokens, SSL Password, etc.) based on an open architecture that integrates into existing computing environments with the added benefit of knowing that each of the "identity" methods listed above (and potentially new ones), can be added or changed at any time through a central administrative function.

"StrikeForce Technologies is excited to participate in Oracle's Identity Assurance Partner Alliance", said Mark L. Kay, CEO, StrikeForce Technologies, Inc. "Our participation will assist our mutual customers in further preventing Identity Theft – an ever increasing problem for all. Our participation in the Alliance better enables us to provide organizations with a fully integrated authentication solution that minimally meets SOX audits, FFIEC guidelines, and Red Flag mandates. This is an exciting relationship as we continue to develop new products for real-time identity theft protection. StrikeForce will continue to explore additional synergistic partnerships in order to expand its customer base and ultimately improve shareholder value"

### **About the Oracle PartnerNetwork**

Oracle PartnerNetwork is a global business network of more than 20,000 companies who deliver innovative software solutions based on Oracle software. Through access to Oracle's premier products, education, technical services, marketing and sales support, the Oracle PartnerNetwork program provides partners with the resources they need to be successful in today's global economy. Oracle partners are able to offer their customers leading-edge solutions backed by Oracle's position as the world's largest enterprise software company. Partners who are able to demonstrate superior product knowledge, technical expertise and a commitment to doing business with Oracle qualify for the Certified Partner levels.
